

SEERIST + GEO OWL: REDEFINING GEOSPATIAL INTELLIGENCE TOGETHER.

Geo Owl's expert geospatial intelligence services empowered by Seerist mission-focused risk and threat intelligence technology.

Expert Team + Innovative AI Tech = Better Global Insights

Our Partnership

- **Integrated Intelligence Fusion:** We fuse advanced risk analysis with precise geospatial insights, offering clients a comprehensive and unified approach to intelligence that enhances decision-making processes.
- **Operational Efficiency:** We'll help streamline operations through innovative technology and geospatial precision, ensuring a more efficient allocation of resources and optimized response strategies to dynamic challenges.
- **Innovative Solutions:** We provide cutting-edge solutions at the forefront of technology, combining Seerist's innovative AI-empowered technology with Geo Owl's successful track record in delivering geospatial excellence across the globe.

AI-EMPOWERED RISK AND THREAT INTELLIGENCE TECHNOLOGY

EXPERT GEOSPATIAL INTELLIGENCE SOLUTIONS TEAM

- ✓ Threat Forecasting
- ✓ Risk Assessment
- ✓ Decision Support
- ✓ Global Monitoring

- ✓ Cleared and Commercial GEOINT Production
- ✓ Full-Spectrum Intelligence Services
- ✓ UAS & C4ISR Solutions
- ✓ Multi-Int Fusion Tech and Integration

About Seerist:

Mission-Focused Risk and Threat Intelligence

Seerist is more than a stream of news and social media. Seerist helps organizations understand how events impact threat, risk, and security levels for every spot on the globe. The Seerist platform and API deliver operational and strategic insight helping agencies make confident data-driven decisions and plan critical operations quicker and more efficiently.

Powered by artificial intelligence (AI), millions of data sources, 200+ geopolitical, security, and risk expertise, and a team with prior military and government experience, Seerist understands the information government agencies need for their missions.

The Seerist Difference

- Ever-evolving machine learning algorithms, informed by an intelligence team, continually honing the validity and veracity of the data.
- Intuitive map-based interface, charts, visual graphics, and dashboards simplifies the exploration, discovery, and assessment of trends and risks.
- Monitors stability across regions and countries to forecast potential disruptions.
- The only solution that delivers both tactical and strategic insights about your threat landscape providing robust decision intelligence.

Among the ways that Seerist ensures mission success:

- ✓ **Threat Forecasting:** Use Seerist's AI-powered analytics to forecast potential threats before they materialize. Stay ahead of the curve and keep your citizens safe.
- ✓ **Risk Assessment:** Evaluate the security and geopolitical risk levels and make informed decisions about resource allocation and strategic planning.
- ✓ **Decision Support:** Leverage Seerist's insights to support policy decisions, crisis management, and strategic initiatives.
- ✓ **Global Monitoring:** Keep an eye on global, regional, and local events and understand their potential impact on your operations.

About Geo Owl:

Creating a future where everyone is empowered through geospatial technology.

Geo Owl is a leading authority in the field of Geospatial Intelligence (GEOINT) with a diverse range of expertise from military intelligence applications to scientific research. Our team of over 100 GEOINT analysts, researchers, and developers support critical high-stakes missions around the globe.

Geo Owl's Team of Experts Provides:

- **Customized Solutions for Critical Missions:** The hallmark of our expertise lies in tailoring solutions for government agencies, defense organizations, and other mission-critical entities. Drawing on deep insights and experience, our team crafts specialized solutions that precisely meet the unique requirements of each client.
- **Strategic Navigation of Geospatial Challenges:** Geo Owl's experts excel in navigating complex geospatial landscapes, employing a nuanced approach that goes beyond the ordinary. This proficiency ensures the delivery of precise and timely intelligence, enabling clients to make well-informed decisions in the dynamic global environment.

Areas of Expertise:

- ✓ **CLEARED AND COMMERCIAL GEOINT PRODUCTION**
- ✓ **FULL SPECTRUM INTELLIGENCE SERVICES**
- ✓ **UAS & C4ISR SOLUTIONS AND SERVICES**
- ✓ **MULTI-INT FUSION TECHNOLOGY & INTEGRATION**
